

1.github是基於git運作的

建立一個# repository

使用前 要先建立資料

```
$ git config --global user.name "John Doe"
$ git config --global user.email johndoe@example.com
```

下載

git clone <https://github.com/how013/2025-10-02.git>

更新

git pull

上傳

git push

上傳步驟

git add .

git commit -m"init"

git push

013Public

PinWatch 0
